Dear Hiring Manager,

I am writing to express my interest in joining your cybersecurity team. As a Computer Science student at the University of Texas at Arlington with hands-on penetration testing experience and the Microsoft Azure Fundamentals (AZ-900) certification, I am eager to apply my technical skills to real-world security challenges and grow within a professional environment.

During my Junior Penetration Tester Internship at EncryptEdge Labs, I gained practical, hands-on experience conducting vulnerability assessments, security testing, and network attack simulations. I participated in incident response exercises, performed post-exploitation enumeration, and drafted professional penetration testing reports — building both the technical skills and communication habits that security teams depend on. My 8-week capstone engagement required identifying and mitigating complex security risks across a simulated environment, reinforcing an analytical, detail-oriented approach to security work.

I am drawn to cybersecurity because of the constant challenge it presents — the threat landscape evolves daily, and staying ahead of it requires both technical depth and creative thinking. I am motivated to keep learning, contribute meaningfully to a team, and develop my expertise across areas including threat analysis, security operations, and governance, risk, and compliance. I am also bilingual in English and Swahili, which I believe adds value in collaborative and diverse team settings.

I am a dependable, self-motivated professional who takes pride in working both independently and as part of a team. I would welcome the opportunity to discuss how my background and enthusiasm for cybersecurity align with your team's needs.

Thank you for your time and consideration.

Sincerely,

Brainard Ndege Juma
